OUR TECHNICAL CONSULTANT

Olympic swimmer and Independent business consultant
Mr. Volker Friedrich

Mr. Volker Friedrich an independent business consultant with a focus on internationalisation, business coach, lecturer, Olympic swimmer and a former German national swimming champion and record holder. After his active swimming career, Mr. Volker Friedrich completed his degree in economics at the Gerhard- Mercator University, Germany. Received degree in only 7 Semester still a record until today. Since 1997 Volker Friedrich is a business & strategy consultant.

Falcons Fiberglass designed its world class Pools and Spa's with the Guidance and technical support of Mr. Volker Friedrich.

Material used in the manufacturing and installation of our pre-formed composition swimming pools are the highest quality and combine with the skilled craftsmen of Falcon pools.

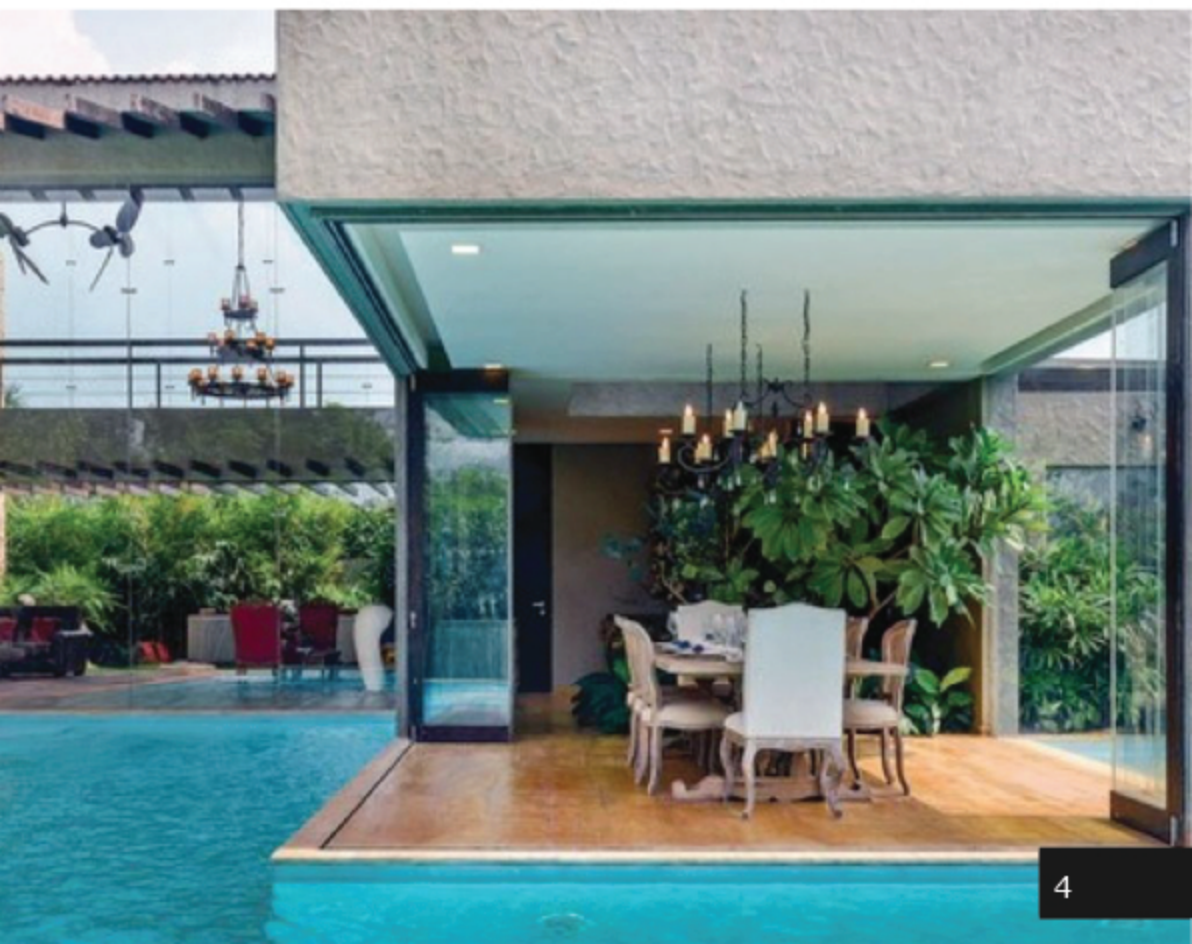

___Falcons Fiberglass factory is manufacturing high quality GRP products in the sate of India since 2019. Our production facilities and business systems are certified by ISO 9001:2015. We are registered member of Indian chamber of commerce.

ABOUT SWIMWELL

Incepted in 2007, Swimwell FRP Pools Private Limited has emerged as a renowned company in India which installs a complete range of Pool and Spa products. Owing to the expertise in the field, Swimwell fabricate and install a wide range of FRP swimming pools with filtrations systems and other lifestyle products. Our range complies with international standards at all levels, besides being economical.

To achieve prompt success, we have quality products and state of the art production facility. Provided with the latest machinery and environment-friendly nature we comprises manufacturing unit, design unit, quality control unit, and research unit. Making the best use of our resources, we have a specialized team of professionals with us. Our range is well suited to be installed in apartments, bungalows, gardens, farmhouses, hotels, resorts, schools and clubs.

SMART POOLS

“Smart pools Are The Future In Pool Design And Building”

We use high quality, modern materials in our swimming pools, along with many others marvels of modern technology: latest exclusively smart filtration and purification, cleaning and jet systems.

Our landscapers and builders will adapt to any terrain, surmount all obstacles, and make sure that you get the swimming pool of your dreams. Falcons Fiberglass Pools & Spas welcomes you to the 21st century of swimming pool technology.

PROFESSIONALISM & SERVICE

Our team hires only the best in the business. We never settle for mediocrity in what we do, and you shouldn't either. Our high level of craftsmanship is exactly why our clients love us, and the majority of our business comes from word of mouth recommendations. All our employees have expertise in various building conditions and the latest swimming pool- construction techniques. After we receive an order, the specifications of each individual swimming pool are discussed in detail with every client and the client is briefed on the building and installation progress every step of the way. All swimming pools come with the necessary warranties.

The unique pre- formed composite pool shell (manufactured, Tiled, and pre- fitted in the factory) is rapidly becoming the industry standard for contemporary pools. This practice minimizes the amount of construction work on site, as the pools are manufactured in the factory under controlled conditions; assuring that the pools are of the highest possible quality

High-Skilled swimming pool installation

Planning and project management

Annual pool service and maintenance

WHAT ARE PRE-FORMED COMPOSITE SWIMMING POOLS, AND WHY DO I WANT ONE?

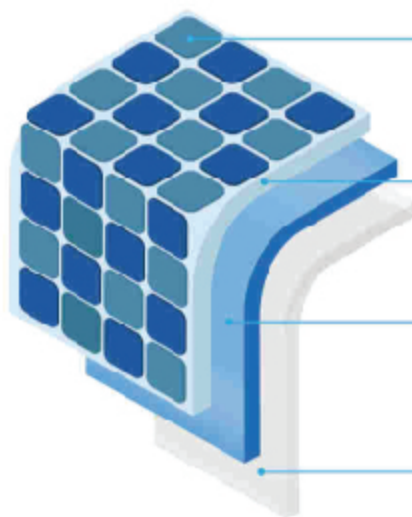

Traditional in ground swimming pools are becoming more and more outdated .They are traditionally built from reinforced concrete. Where entails : noisy, expensive, time consuming, uncertainty, and extensive groundwork. That's why swimming pool manufacturers have slowly been turning to new technologies and building techniques

Other available product are plain fiberglass pools which are quick and easy to install, but are of limited quality and longevity.

Pre-formed composite OLS and spas are are essential a combination of four material (glass reinforced plastic "GRP" ,epoxy laminate, and porcelain ceramic mosaic tiles with epoxy grout) designed and engineered to provide the unique properties of our swimming pools. With a pre-formed composite swimming pools you get the best of both worlds. The pools are manufactured, hand tiled in the factory all the fitting installation, thus creating a fully tiled, permanent in-ground pool without the need of extensive construction groundwork.

PRE-FORMED, COMPOSITE POOL SHELL

It is the composite structure of the 4 materials working together which provides the unique properties of the pre-formed pool shell.

PROCELAIN CERAMIC MOSAIC TILE

A hand applied mosaic tile creates the internal finish. We use epoxy grout to maximize service life while also providing the choice of a wide range of colours and mosaic style

EPOXY GROUT

Epoxy grout is the strongest adhesive/grout material used internationally as well as being a repellent to algae bacteria.

EPOXY LAMINATE

The inner layer is a 2 part reactive epoxy adhesive. This system cures to form an epoxy laminate which completely prevents exposure of the GRP to pool water and other chemicals.

GLASS REINFORCED PLASTIC "GRP"

The Glass Reinforced Plastic outer body consist of spray applied, high performance resins reinforced with woven glass fibers. This forms the main body of the pool.

POOL COMPARISON

PRO. ■

CON. ■

Fiber glass/plastic LOW COST	Concrete/Gunite TRADITIONAL	Pre-formed composite CONTEMPORARY
■ Smooth, nonporous surface	■ Long history of industry use	■ Composite structure of pool ensures its longevity
■ Installed faster than a gunite pool	■ Standard, solid look	■ Outstanding Finished appearance
		■ Provides a completely watertight pool shell
		■ Quick and simple to install roughly two weeks of on- site work for standard pools
■ Heat distortion - when a pool surface gets hot it can blister, crack, and fade at certain temperatures, depending on the type of fiberglass resin used	■ Takes a minimum of 3 months to build, due to curing	■ Available in all pool types, including overflow, vanishing edges, and skimmer
■ Limited in size / design	■ Steel reinforced creates durability risk especially in corrosive environments.	
	■ Maintenance intensive	■ Could be more costly for extreme free- form designs
	■ Subject to the vagaries of on site construction	
	■ Messy & Noisy construction process	
LIFE SPAN	LIFE SPAN	LIFE SPAN
5 YEARS	10 YEARS	25+ YEARS

SAFETY

All large bodies of water are potential safety hazards, and swimming pools are exceptions, specially for young children and non-swimmers. Open children and non-swimmers should be under constant supervision.

We are falcons pool & Spa do everything we can to ensure the safety and well-being of our clients. Our pool are easy to access by sturdy and well-marked walk-in steps. The pool is well lit.

OUR SPECIALITY IN GUNITE / SHOTCRETE SWIMMING POOLS. FROM VISION TO REALITY

Note : Based on local building conditions, variations in these steps or sequence may be warranted in order to ensure effective efficient construction and full regulatory compliance. Local conditions also affect the sequence of the quality inspections that Falcons fiberglass performs throughout the building process. The steps here broad view of the key phases of concrete pool construction, not related ones such as the installation of slides, covers, fence or solar heating.

STEP 1 :- PERMITTING & CONSTRUCTION PLAN

In adherence with local building codes falcons fiberglass submit your pool plan to the appropriate agencies for review and approval and obtain any required permits. Falcons Fiberglass will then create a detailed construction plan and depending on local building condition and construction needs will identify elevations, utilities, and any variable unique to your yard that impact construction.

STEP 2 :- LAYOUT

Following your construction plan ,excavation specialists carefully plot out the location shape size and elevation of your pool. Before the first bit of earth is turned, you you will have the opportunity to review this layout and approve it in writing.

STEP 3: EXCAVATION

Excavation equipment removes the necessary soil to form the shape of your pool & spa. Since mechanical earthmovers can never achieve the human touch, Falcons Fiberglass has a team hand contour the pool walls and floor per construction plans.

STEP 4: STEELING

Structural support is vital, so Falcons Fiberglass fortifies your entire pool & spa with steel. Carefully installed and laced together at specified intervals, steel bars create a protective backbone for optimal structural integrity. Falcons add extra steel in the deep end and in pools built in expansive soil to ensure solid, long-lasting construction.

STEP 5: PLUMBING

A professional plumbing crew lays a series of corrosion-resistant schedule-PVC pipes between the skimmer, main drains, return lines, accessories & equipment. After a pressure test proves the integrity of each of the connections, this network is ready, and our crew will install the filtration equipment and any purification systems.

STEP 6: ELECTRIC

In accordance with all state & local code requirements, a licensed electrical contractor installs appropriate wiring and connects the power supply to the pump, heaters, timing devices, lighting, and remote controls and if you have one, a heat pump.

STEP 7: STEEL-REINFORCED CONCRETE

High-strength concrete mix is pneumatically applied with intensive pressure and depth to form a tough, solid, monolithic shell around the reinforcing steel. Curves, loveseats, steps, and spa areas are then carefully sculpted by hand.

STEP 8: COPING

Expert coping masons will install your pick of stone, brick, safety-grip, or other special edging materials along the bond beam—the entire top of the pool border creating a picture frame for your pool & spa. Any special masonry work, such as waterfalls or accent boulders, is usually performed at this time.

STEP 9: TILING

Using your choice from our international collection of ceramic designs, a series of tile is neatly hand laid under the edge of the coping along the waterline. Along with the added depth & beauty they give your pool's "picture frame," tiles can also be used to accent pool steps and walls or to create in-floor mosaics.

STEP 10: DECKING

To complement your poolscape design and ensure an attractive durable deck that's appropriate for your soil and climate. Falcons offer full range of various materials, colors, textures, and surfaces. Typically, the forming or layout is completed in one day, and actually installation takes one to two days

STEP 11: INTERIOR FINISH

A plastering team will cover every curve, contour, and corner with your choice of plaster or SmartBrite - our smooth, long-lasting finish with color quartz aggregate. Once it is applied over the concrete creating a sleek, uniform appearance- its time to add water and install any accessories.

STEP 12: START UP

When your pool is filled, Falcons Fiberglass sends a start-up specialist to your home to provide an orientation. You will review your the Features & accessories and receive operation instructions both verbally and in writing. Now, you're ready to...

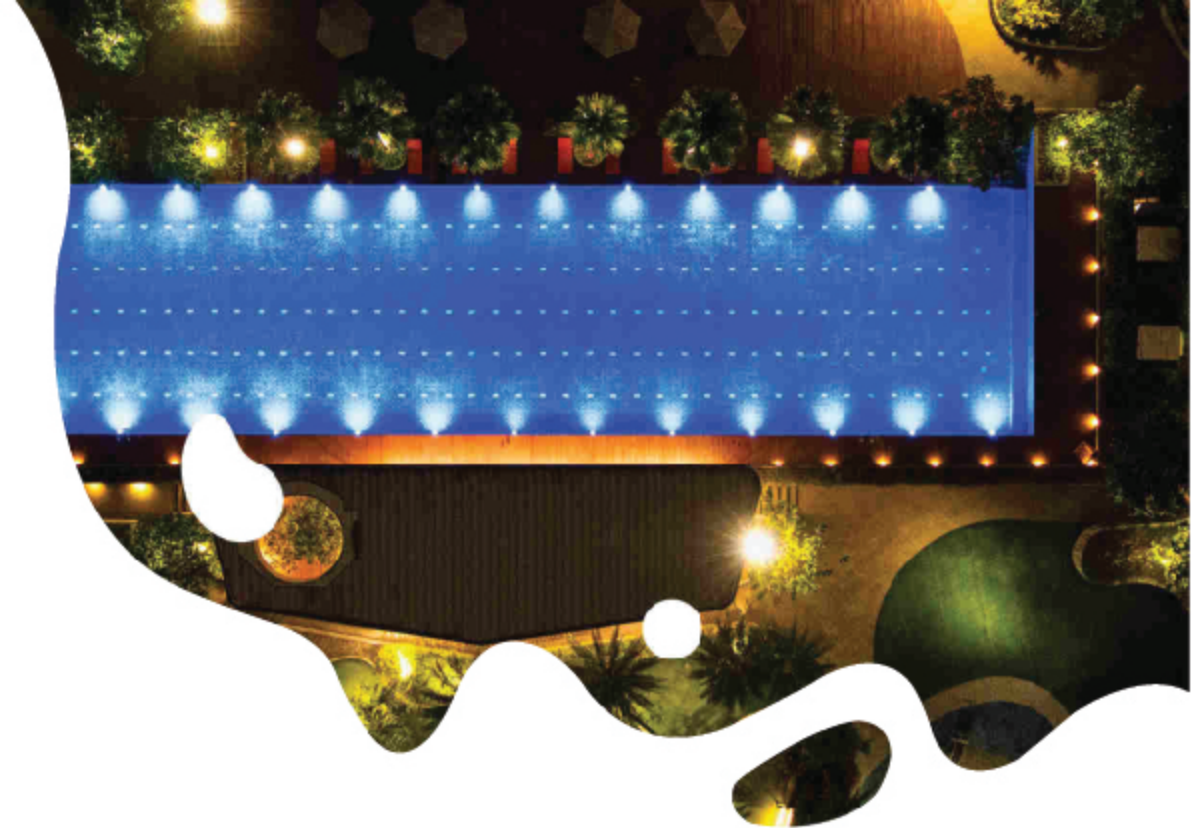

STANDARD STYLES OR CUSTOM DESIGN

Falcons Pool & Spa offers you the possibility of designing your dream swimming pool. We offer a stunning range of standard pool styles to choose from in our Style Gallery. However, if you wish, we can custom design your pool according to your detailed requirements.

Whether you require a Traditional or a Freeform pool our team can design and build your pool according to your very own unique specifications.

We create swimming pools that are 100% custom designed for you. From size and shape to choice of finish, we work together to build your dream swimming pool that works well with the layout of your home.

GENERAL POOL FEATURES

-  Easy access Walk in steps
-  Hand tiled mosaic finish
-  Seating and ledges
-  Safe, smooth, and easy to clean surfaces
-  Temperature control
-  A well-engineered and proven Sanitation system
-  In-pool & Out pool lighting
-  Customizable pool form
-  Water conditioning

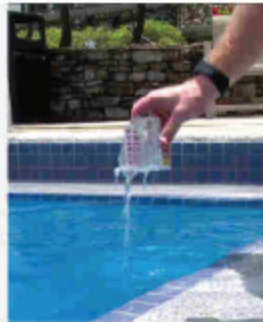

Our swimming pools also offer additional features, such as the salt system, non-chlorine oxidation, and water temperature control. Contact us for more information.

Traditional swimming pools treat water with chlorine and chemicals, which result in unpleasant swimming experiences such as redness of the eyes, damaged hair, dry skin, discomfort, and the offensive chlorine odor.

SWIMMING POOL CHEMICALS

WATER TESTING

TRAINING POOL

AN OASIS OUTSIDE YOUR DOOR

A Compact Pool can fit in almost any backyard, no matter the size. Compared to traditional pools, the Compact Pool requires less maintenance heats more affordably, and preserves more of your property for gardening and other recreation.

BACKYARD

The backyard pool has long been a vital part of the American Dream of homeownership. Falcons Pools & Spa lets you realize that dream with more versatility for swimming and exercise as well as a smaller footprint to maximize the rest of your yard. With its compact size and the ability to super-insulate the cabinet, you can enjoy outdoor swimming in a warm, energy- efficient pool all year round- even in colder climates!

DECK/PATIO

The perfect centerpiece for a new or existing patio, Falcons Pools & Spa lets you create an at-home sanctuary for exercise and entertaining. Its small footprint gives you added versatility. Build a deck around your pool to create an in-ground feel without the cost of excavation. Or recess the pool into a deck and add extra-wide coping to create poolside seating.

PLACEMENT

The perfect centerpiece for a new or existing patio, Falcons Pools & Spa lets you create an at-home sanctuary for exercise and entertaining. Its small footprint gives you added versatility. Build a deck around your pool to create an in-ground feel without the cost of excavation. Or recess the pool into a deck and add extra-wide coping to create poolside seating.
